Jorge Eduardo Alpizar Mejías

Calcular kp, ka kv respectivamente para la función g(s)

$$G(s) = \frac{7}{S^2 + 8}$$

| kv | ka |
|---|---|
| $kv = \lim_{s \to 0} s * G(s)$ | $ka = \lim_{s \to 0} s^2 * G(s)$ |
| $\lim_{s \to 0} s * \frac{7}{S^2 + 8} = 0$ | $\lim_{s \to 0} s^2 * \frac{7}{S^2 + 8} = 0$ |
| $e_{ss} = \frac{1}{kv}$ | $e_{ss} = \frac{1}{ka}$ |
| $e_{\scriptscriptstyle SS}=rac{1}{0}=\infty$ | $e_{SS} = \frac{1}{0} = \infty$ |
| | $kv = \lim_{s \to 0} s * G(s)$ $\lim_{s \to 0} s * \frac{7}{S^2 + 8} = 0$ $e_{ss} = \frac{1}{kv}$ |
